## GENERAL DIRECTIONS TO CUSTOMERS

By carefully observing the following directions, mistakes and misunderstandings will be very largely avoided:

**How to Order.** Please be careful to sign your Name, Post Office, Rural Route, and State on every order. Be sure to tell us your nearest express office, should you desire shipment by express. **Write plainly.**

**Cash with Order.** Ours is a cash business and our prices are made on that basis. Customers are requested to remit when ordering. If seeds or bulbs are wanted C. O. D., 25 per cent, or one-fourth of the amount of the order, must accompany the order. **No Plants Shipped C. O. D.**

**How to Send Money.** Remittances should be made by Post Office Money Orders, Express Money Orders, Drafts, or Checks on New Orleans or New York. Where it is not possible to obtain these, the letter should be registered. In all cases where the order amounts to \$1 or more, the cost of post office or express money order, or cost of registering the letters from places that are not money order offices, may be deducted from the amount of the order.

**Stamps.** On orders where the amount is less than 50 cents, we will accept stamps in good condition (1 and 2-cent stamps preferred) the same as cash, but we would ask those remitting stamps to wrap them in oiled paper, if possible, to prevent their sticking together or to the order.

**Non-Warranty.** Chris Reuter does not give, and his agents and employees are forbidden to give, any warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, plants, etc., he sends out, and he will not be any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once, and if the money

has been paid for them, it will be refunded. **No Responsible Seedsman Gives Any Warranty.**

**Tested Seeds.** We test all our seeds before sending them to our customers, and should they fail to grow, if promptly and properly tested by customers, we will replace the same amount or give value in others. We cannot afford, knowingly, to send out seeds doubtful as to vitality or purity, and you cannot get any better stocks of any seedsman, even though he deceitfully professes to warrant seeds.

Only the very best seed should be sown on lawns, golf courses, and grounds devoted to sports. # Plant Your Winter Vegetable Garden Now!

**D**URING the fall months, thousands of acres in winter vegetable crops are planted by market gardeners and commercial truckers. These important and profitable crops are harvested during January, February, and March and distributed in carlots to all of the large consuming markets of the United States and Canada.

The commercial trucker does not need to be told when to plant, for it is his business to know, but the home gardener, generally, is overlooking an opportunity and should consider having a winter garden that his table may be supplied regularly with a full supply of fresh, crisp, tender vegetables at a time when they are usually scarce and high-priced.

In most sections of the South, where the majority of our customers are located, the following vegetables may be planted during the fall, with gratifying success:

**Cabbage, Beets, Beans, Cauliflower, Carrots, Kale, Lettuce, Mustard, Celery, Onions, Garden or English Peas, Radishes, Spinach, Turnips, Rutabagas, Swiss Chard, Salsify, Leeks, Parsley, Kohlrabi, Endive, Parsnips, Squash, Brussels Sprouts, Shallots or Multiplying Green Onions.**

During November and December, throughout the lower South, Cucumbers, Eggplants, Peppers, and Tomatoes are planted in hotbeds for setting out during early spring when all danger of frost has passed.

**Market Gardeners and Truckers.**—Write for our current price-list, telling us the quantities and kinds of seeds that you plan to sow.

**Home Gardeners.**—If you have not received, or have mislaid our Fall Catalogue, send us a postcard with your full name and address and we will be glad to send you a copy by the next mail.
